
Dr. I. Ginsburg,  
U. S. Bureau of Fisheries,  
Washington, D. C.

Dear Dr. Ginsburg:

We have identified the following species of *Fundulus* - *F. similis* and *F. heteroclitus grandis*. They were caught near the laboratory on Lemon Bay. Should you desire specimens we will gladly forward you some.

We have also identified two species of sea-horse in the locality as follows - *H. hudsonius* and *H. zosterae*.

Work is going on well down here and we expect to have a long list of identified species soon.

Yours very truly,

JFB:RB  
John F. Bass, Jr.
