The Tribune Press,
Tampa, Florida.

Gentlemen:

Enclosed is the corrected layout for the pamphlet. The new prints are pasted in their proper location. It will be necessary to cut the picture of the entire laboratory grounds so that there will not be so much sky showing. The picture of the schooner should have as much contrast on the half-tone as is possible.

There are just a few corrections that should be made and I shall make them under the paragraph headings:

Under the paragraph, Laboratory Grounds, the second sentence reads; There is a dock and small salt water laboratories on the water front. Change this to read; There is a dock and a small salt water laboratory on the water front.

Under the paragraph, Equipment, the third sentence should read; A quantity of glassware and aquaria is kept on hand, as well as most of the standard chemicals and stains.

The last line of the folder should read; On request, instead of, On Application.

If these corrections are clear, and if you think that there are no more points in question, you may print 2,000 of the folders at $57.75. Please notice the manner in which the pamphlet is folded and please number the pages accordingly. Of course, we will expect a galley proof before the pamphlets are actually printed.

Yours truly,
